

HOSTING

PARTNER

Powerful Hosting Solutions for All of Our Clients

ITworx Consulting has partnered with PowerDNN to provide engineering and website hosting solutions for our customers. With more than a decade of experience, PowerDNN has designed and supported the infrastructure for small- and large-scale websites alike. PowerDNN works closely with the ITworx team to ensure your website is always up and running at peak performance.

24/7/365 Support

Through our partnership with PowerDNN, our clients have full access to Managed.com's 24/7/365 support team. No one knows CMS and website support better than Managed.com. Their support team is dedicated to providing you peace of mind for your website.

99.999% Datacenter Uptime

PowerDNN has hardened datacenters located around the world. As an ITworx customer, your website will be secured in PowerDNN's reinforced facilities backed by 99.999% datacenter uptime, multiple fiber connectivity, biometric security, and redundant power/cooling.

Advanced Engineering

PowerDNN's engineers can design an infrastructure and technology solution for any need. PowerDNN senior engineers are always available. You can even schedule a conference call with their engineers to answer any questions you may have.

An Extension of Your Team

ITworx has a reputation of creating true partnerships with our clients. This is why PowerDNN was such a perfect fit for our company, our culture, and our customers. Their team is dedicated to supporting ours — and yours. They understand that technology needs are different, and they work with our team to design technology solutions that are perfect for you and your organization's needs.
